Section A: Multiple-Choice Questions (40 marks)

Choose the correct answer. Each question is worth 2 marks.

1. Which of these is a non-living thing? ( )

(1) Dog (2) Chair (3) Ant (4) Fish

2. Which is a characteristic shared by ALL living things? ( )

(1) Having fur (2) Being able to fly (3) Needing air, food and water
(4) Living in water

3. Which part of a plant takes in water and nutrients from the soil? ( )

(1) Leaf (2) Flower (3) Root (4) Stem

4. Which group of animals is usually covered in scales? ( )

(1) Mammals (2) Birds (3) Fish (4) Insects

5. Which of these animals gives birth to live young (does not hatch from an egg)? ( )

(1) Chicken (2) Frog (3) Cat (4) Butterfly

6. Which of these is NOT true about fungi? ( )

(1) They can reproduce using spores (2) They can make their own food using sunlight
(3) They feed on dead or decaying matter (4) Mushrooms are an example of fungi

7. Which material is the best choice for making an umbrella canopy? ( )

(1) Paper (2) Cotton (3) Plastic (4) Wood

8. Which material is most likely to shatter when dropped? ( )

(1) Rubber (2) Glass (3) Cloth (4) Foam

9. Which of these will sink in water? ( )

(1) A plastic bottle cap (2) A metal spoon (3) A wooden block (4) An empty balloon

10. Which stage comes right before the "young plant" stage in a bean plant's life cycle? ( )

(1) Adult plant (2) Flower (3) Seedling (4) Fruit

11. Which animal's life cycle has 4 stages, including a pupa? ( )

(1) Cockroach (2) Grasshopper (3) Mosquito (4) Chicken

12. Which stage of a frog's life cycle comes right after the egg? ( )

(1) Adult frog (2) Tadpole (3) Tadpole with legs (4) Froglet without a tail

13. A pupil tests how far three toy cars roll after being pushed with the same force. What is she finding out? ( )

(1) Which car design rolls the farthest (2) Which car is the heaviest
(3) Which car is the most colourful (4) Which car was made first

14. In a fair test, what does it mean to "keep a variable the same"? ( )

(1) Make sure that factor does not change between tests
(2) Change that factor every time (3) Ignore that factor completely
(4) Only test it once

15. The graph shows the height of four bean plants after two weeks. Which plant grew the LEAST? ( )

(1) Plant A (2) Plant B (3) Plant C (4) Plant D

16. Which material would NOT be suitable for making a window, because it is not transparent? ( )

(1) Glass (2) Clear plastic (3) Wood (4) Clear film

17. Which of these does NOT need food to survive? ( )

(1) A tree (2) A rock (3) A bird (4) A fish

18. Which of these animals is covered in fur and feeds its young with milk? ( )

(1) Chicken (2) Fish (3) Rabbit (4) Lizard

19. Which of these is a fungus, not a plant? ( )

(1) Fern (2) Mushroom (3) Grass (4) Moss

20. Which pair correctly matches an animal with its number of life-cycle stages? ( )

(1) Cockroach — 4 stages (2) Butterfly — 3 stages (3) Mosquito — 4 stages
(4) Chicken — 4 stages

Section B: Structured Questions (16 marks)

Write a short answer, or tick True or False, for each question. Each question is worth 2 marks.

21. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) Giving an animal food is a way to TEST whether it is alive.	
(b) Watching an animal respond when gently touched is a way to TEST whether it is alive.	

22. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) A mosquito's life cycle includes a pupa stage.	
(b) A cockroach's life cycle includes a pupa stage.	

23. Name ONE place where mosquitoes commonly lay their eggs around a home. (2 marks)

_____

24. Give one property that makes rubber suitable for making the soles of shoes. (2 marks)

_____

25. To find out which type of soil holds the most water, three pots are each filled with the same amount of water. What else should stay the same for every pot? ( )

(1) The amount of soil in each pot (2) The type of soil in each pot

(3) The colour of the pot (4) The time of day

26. Why is it important to repeat an experiment several times? ( )

(1) To use up more materials (2) To check that the results are similar each time (reliable)

(3) To make the experiment take longer (4) To make it harder for other pupils

27. Give one way fungi get their food that is different from how green plants get their food. (2 marks)

_____

28. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) A material that is waterproof lets water pass through it easily.	
(b) A material that is flexible can bend without breaking.	

Section C: Open-Ended Questions (24 marks)

Explain your answer in full sentences. Each question is worth 3 marks.

29. A caterpillar enters a pupa (chrysalis) before becoming a butterfly. Explain what happens to its body during the pupa stage, and whether it eats or lays eggs during this time. (3 marks)

30. A cockroach's life cycle has only 3 stages (egg, nymph, adult), while a mosquito's life cycle has 4 stages (egg, larva, pupa, adult). Explain one difference between the cockroach's nymph stage and the mosquito's stages before it becomes an adult. (3 marks)

31. A tadpole changes a great deal as it grows into an adult frog, but a chick changes very little as it grows into a hen. Describe ONE body change a tadpole goes through that a chick does not. (3 marks)

32. In Singapore, mosquitoes often lay their eggs in small amounts of stagnant water, such as in flower pot trays. Explain why removing stagnant water around the house helps to prevent dengue fever. (3 marks)

33. Siti says mushrooms and ferns are the same kind of living thing because both can reproduce using spores. Explain the KEY difference between fungi (like mushrooms) and plants (like ferns). (3 marks)

34. A pupil wants to find out which type of paper, thin or thick, is the strongest. She hangs the same weights on strips of each type of paper, of the same length and width, until they tear. Describe what was changed, what was kept the same, and why this makes it a fair test. (3 marks)

35. A pupil wants to find out which material — foam, cloth or plastic — keeps a cup of hot water warm the longest. She wraps each material around an identical cup filled with the same amount of hot water at the same starting temperature, and checks the temperature after 10 minutes. Describe what was changed, what was kept the same, and why this makes it a fair test. (3 marks)

36. A pupil wants to choose a material to make a school bag. Explain why canvas fabric would be a good choice, giving its properties and the reason each one matters. (3 marks)

End of paper. Check your answers.
