Name: Class: Score: / 80

Section A: Multiple-Choice Questions (40 marks)

Choose the correct answer. Each question is worth 2 marks.

1. Which of these is a living thing? ( )

(1) Rock (2) Table (3) Plant (4) Chair

2. Which of these is NOT a characteristic shared by all living things? ( )

(1) They grow (2) They need food or nutrients (3) They have wheels
(4) They can reproduce

3. Which plant is a non-flowering plant? ( )

(1) Fern (2) Sunflower (3) Hibiscus (4) Orchid

4. Which group of animals is usually covered in feathers? ( )

(1) Mammals (2) Birds (3) Fish (4) Reptiles

5. Which of these animals hatches from an egg? ( )

(1) Dog (2) Cat (3) Chicken (4) Rabbit

6. Mushrooms belong to which group of living things? ( )

(1) Plants (2) Animals (3) Fungi (4) Bacteria

7. Which material would be the best choice for making a raincoat? ( )

(1) Cotton (2) Paper (3) Plastic (4) Wool

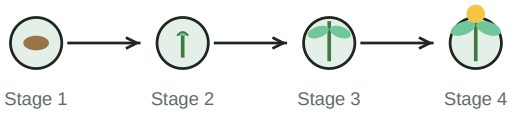

8. Which material bends easily without breaking? ( )

(1) Glass (2) A rubber band (3) Wood (4) A ceramic plate

9. Which object will float in water? ( )

(1) An iron nail (2) A stone (3) A wooden block (4) A metal coin

10. Look at the stages of a bean plant's life cycle. Which stage comes right after the seed germinates? ( )

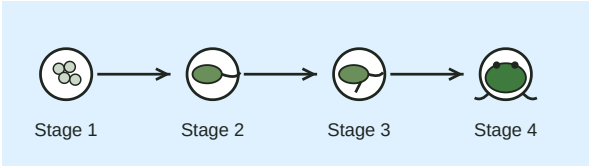

(1) Seedling (2) Adult plant with flowers (3) Fruit (4) Seed again

11. Which animal has a life cycle with only 3 stages (egg, nymph, adult — no pupa stage)? ( )

(1) Butterfly (2) Mosquito (3) Cockroach (4) Beetle

12. Look at the stages of a frog's life cycle. Which of these is NOT actually one of its stages? ( )

(1) Egg (2) Tadpole (3) Pupa (4) Adult frog

13. Which animal's life cycle includes a pupa stage? ( )

(1) Frog (2) Cockroach (3) Butterfly (4) Chicken

14. Which material is transparent? ( )

(1) Wood (2) Glass (3) Metal (4) Cloth

15. Which of these is a non-living thing? ( )

(1) Tree (2) Bird (3) Cloud (4) Fish

16. Which part of a flowering plant usually produces its seeds? ( )

(1) Root (2) Stem (3) Flower (4) Leaf

17. Three strips of material are tested for strength by hanging weights on them. To make this a fair test, what must stay the same for every strip? ( )

(1) The colour of the material (2) The length and width of each strip
(3) The time of day (4) The name of the person testing it

18. A pupil wants to find out which material is the most waterproof. What should she keep the same for every material tested? ( )

(1) The amount of water dripped and the time waited (2) The type of material
(3) The colour of the water (4) The name of the material

19. The graph shows how tall four bean plants grew in two weeks, each given a different amount of sunlight. Which plant most likely received the most sunlight? ( )

(1) Plant A (2) Plant B (3) Plant C (4) Plant D

20. Which material is most suitable for making a window pane? ( )

(1) Wood (2) Glass (3) Fabric (4) Cardboard

Section B: Structured Questions (16 marks)

Write a short answer, or tick True or False, for each question. Each question is worth 2 marks.

21. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) All living things need food or nutrients to survive.	
(b) All living things are big enough to see without a microscope.	

22. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) A fern reproduces using spores, not seeds.	
(b) All plants produce flowers.	

23. Give one property that makes a material suitable for making a raincoat. (2 marks)

24. Give one property that makes a material suitable for making a window. (2 marks)

25. In an experiment to find out which of three cloths absorbs the most water, each cloth is dipped into the same amount of water for the same length of time. What should the pupils measure? ( )

(1) The colour change of the cloth (2) The weight or amount of water absorbed

(3) The smell of the cloth afterwards (4) The size of the cloth

26. Why should a science experiment be repeated more than once? ( )

(1) To use up more time (2) To make the results more reliable

(3) To make the experiment harder (4) To use up more materials

27. Name the stage of a butterfly's life cycle between the larva (caterpillar) and the adult butterfly. (2 marks)

_____

28. Tick True or False for each statement. Write True or False.

Sentence	True / False
(a) A cockroach's life cycle has 3 stages: egg, nymph and adult.	
(b) A chicken's life cycle includes a pupa stage.	

Section C: Open-Ended Questions (24 marks)

Explain your answer in a full sentence. Each question is worth 3 marks.

29. A plant kept in a dark cupboard for two weeks grew tall and thin, with pale yellow leaves instead of green ones. Explain why this happened. (3 marks)

_____

_____

30. A pupil found a snail that is not moving and does not respond when touched gently. Describe two other ways she could test whether the snail is alive, other than just looking at it. (3 marks)

_____

_____

31. Siti says, "Mushrooms are plants because they grow in soil." Explain why Siti is incorrect. (3 marks)

_____

_____

32. A pupil wants to make a bag to carry heavy books. Explain why a bag made of thin paper would not be a good choice, and suggest a better material. (3 marks)

33. A caterpillar changes into a butterfly through a pupa stage, but a cockroach nymph already looks similar to an adult cockroach. Explain one difference between these two life cycles. (3 marks)

34. A pupil wants to choose a material to make the sole (bottom) of a rain boot. Explain why rubber would be a good choice, giving TWO properties of rubber that make it suitable. (3 marks)

35. A pupil tested three balls — a rubber ball, a glass marble and a foam ball — by dropping each from the same height onto the floor and observing how high it bounced. Explain why dropping them from the same height was important for this experiment. (3 marks)

36. A tadpole looks very different from an adult frog, while a chick looks quite similar to an adult chicken. Explain this difference. (3 marks)

End of paper. Check your answers.
